Q1: What is your current job/career?

Musician/Actor

Q2: Why did you choose your job/career? - did you have a plan? - what resources if any did you use?

Performing is something I've always loved doing, I started when I was about 9 in musical theatre. I knew pretty early on that I'd found my passion so I participated in as many acting/music based events that I could. My plan was to study music/drama at university but I managed to get an acting agent before I finished school.

Q3: How would you like your job/career to develop and what do you need to do to make the change?

I'd like to be touring the world with my band and one day write and star in films. To make this happen I feel that I just need to continue learning, whether it be studying my craft through tuition and practice or just asking a lot of questions of people who are successful and hearing their perspective.

Q4: When you were a child, what did you want to be when you grew up?

I remember wanting to play Electric Guitar when I was in Kindy. It was always going to be something to do with music, acting or sport.

Q5: What challenges do you need to overcome to "get the life you love"?

I need to be more assertive and get things done as soon as I can, rather than putting them off.
